

AM 45

AM 45

The AM45 brings together three decades of Seawave Acoustic's innovative technology. Designed to surpass our formidable Reference horn speaker, but in a more widely-accessible size, the AM45 has exceeded even our most ambitious expectations.

Bo San CEO of Seawave Acoustic

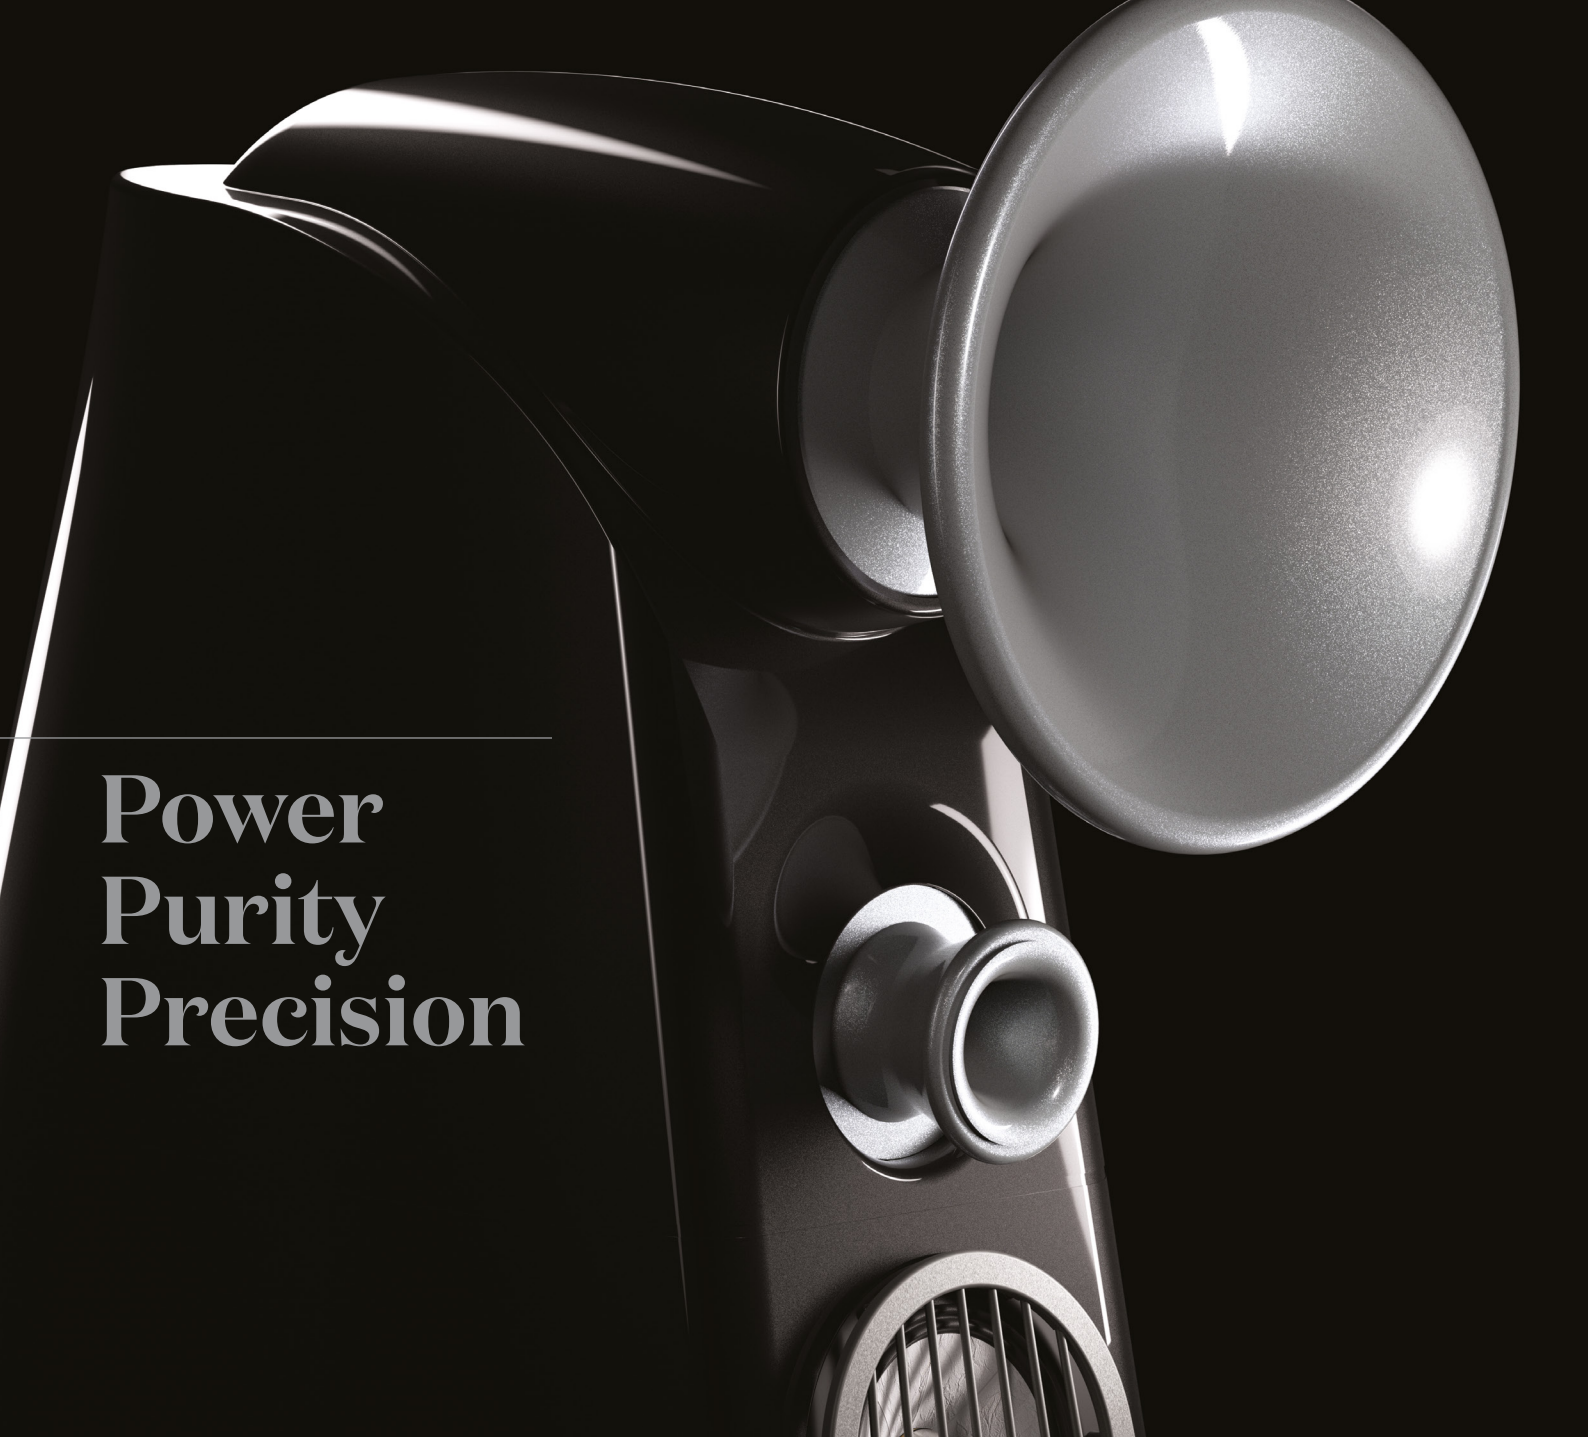

Comprising a 4-way 5 driver array, the AM45 can deliver a flat frequency response from 20 Hz to 35 kHz and, in a typical reference environment, has almost unlimited headroom. Its prodigious two module AC4C aluminium cabinet also makes it capable of producing lightning fast subsonic frequencies.

With its astonishing speed, control, and detail, the AM45 realises our mission of bringing the acoustics of the concert hall into the music room.

Incorporating our latest generation of electronic components, the AM45 is designed to create the purest possible signal pathway, producing a freshness and vitality that will bring new life to your favourite performances. A discerning client recently reported, "I'd loved this 'live' recording for twenty years, but thanks to your new speakers, it was as thrilling to me as was the first time I heard it!".

We're exceptionally proud of our new horn speaker, and once you experience it for yourself, we're sure you will appreciate the work and dedication that have gone into bringing the AM45 to fruition.

Power Purity Precision

Technical Specifications

Design	True Horn Speaker, 4 Way / 5 Speaker
Driver units	Super Tweeter: 1" Hanji Compression Driver Midrange: 2" Titanium compression driver Midbass: 6" Hanji Woofer: 8" Hexacone, 11" Hexacone
Enclosure	AC4C Aluminium Modular Unicast Cabinet
Frequency response	20 Hz - 35kHz (± 2 dB)
Amplifier requirements	100 ~ 1,000 W
Sensitivity	94 dB
Impedance	4 Ohm
Weight	150 kg
Dimensions (WHD)	1500 H x 506 W x 783 D mm
Colours	Black & Red / Black & Silver / Poseidon Blue & Marine Beach / Cream & Green
