

ELETTRA

BEST REALISM EVER

- Only two way, that is to say, only one driver transition, at 800 Hz, so that all the frequencies over 800 Hz are reproduced by a single source
- New technology for all the frequencies from 800 Hz to 20.000 Hz, called Large Format Waveguide, which is a single 70 cm high waveguide: the result is the correct dimension of all the virtual sound sources, from big symphony orchestra to intimate jazz trio
- New technology for the low frequencies, called High Speed Woofer, which is a 15" woofer with a new special membrane in light and rigid cellulose mixture: this big woofer can be driven also by the most delicate of the triodes and follows quickly the microdynamics of sounds in detail and without delay
- Large Format Waveguide + High Speed Woofer: stunning musical realism

Type : 2 way, bass reflex
Low: 15' woofer
Mid-High: Large Format Waveguide (LFW)
Crossover: First order crossover without attenuation resistor
Dimensions: 59 cm (L) x 65 cm (W) x 140 cm (H)
Weight: 70 kg
