

THE ELIXIR

Exquisite in form and sound. Delicate and visceral, with perfect balance and harmony. THE ELIXIR is a two driver, 2-way bookshelf speaker using the same technology and drivers developed for the highly acclaimed Hansen Audio model THE KING E2. The woofer / mid-band driver is engineered, designed and manufactured by Hansen Audio (to match perfectly with the High Precision tweeter made for Hansen Audio). This driver uses the exotic multi-layer composite sandwich cone mated to the powerful Hansen optimized geometry motor assembly. All Hansen Audio drivers incorporate *Sound Wave Deformation Prevention* technology. The elegant hybrid enclosure utilizes the Hansen Audio engineered *Hansen Composite Matrix* material, finished in the Hansen Audio Luxury Leather (animal free) finish. The enclosure uses the same *Sound Wave Diffraction Distortion Elimination* technology developed for the reference model THE KING E2.

All Hansen Audio speakers are meticulously hand-built in Canada, incorporating Hansen Audio designed and built drivers. This marriage of advanced scientific research, dedication to a philosophy of uncompromising quality, purity of sound, and gracefully elegant cabinets are at the heart and soul of Hansen Audio Speakers. THE ELIXIR is designed sonically and visually, to last, and be enjoyed for many generations to come.

While words can convey something of the craft and science that make our speakers the best of the best. Only when listening can you fully appreciate how great they truly are.

FINISHES: Hansen Audio Luxury Leather Finish in Terra Cotta, Stone or Black

Specifications

Time & dispersion coherent / True dynamic / Tonal accurate
Frequency response: 32Hz - 23kHz / Impedance: 6 ohms / Sensitivity: 87dB
Tweeter: 25mm (1") high performance dome / Mid-band, Woofer driver: 182mm (7.2")
Dimensions: 23"H x 9"W x 12"D
