

THE KING E2

An Unforgettable Listening Experience

THE KING (E)NLIGHTENED!

LONG LIVE THE KING!

Exquisite in form and sound. Authoritative, powerful and delicate when called upon, THE KING E2 was created with perfect balance and harmony. It is the benchmark reference speaker that others are judged by.

THE KING E2 is a six driver, 3-way floor standing speaker using Hansen Audio's proprietary hand assembled drivers. The two woofers and dual mid-band drivers are engineered, designed and manufactured by Hansen Audio (to match perfectly with the High Precision tweeters made for Hansen Audio). These drivers all use the exotic multi-layer composite sandwich cones mated to the powerful Hansen optimized geometry motor assembly. All Hansen Audio drivers incorporate *Sound Wave Deformation Prevention* technology. The elegant enclosure utilizes the Hansen Audio engineered *Hansen Composite Matrix material*, finished in the Hansen Audio Luxury Leather (animal free) finish. The enclosure incorporates Hansens's *Sound Wave Diffraction Distortion Elimination* technology.

All Hansen Audio speakers are meticulously hand-built in Canada, incorporating Hansen Audio designed and built drivers. This marriage of advanced scientific research, dedication to a philosophy of uncompromising quality, purity of sound, and gracefully elegant cabinets are at the heart and soul of Hansen Audio Speakers. THE KING E2 is designed sonically and visually, to last, and be enjoyed for many generations to come.

FINISHES: Hansen Audio Luxury Leather Finish in Terra Cotta, Stone or Black
