SFR OPEN BAFFLE

BASSOON

J A F Bassoon is a basic model of the floor standing electroacoustic loudspeaker.

JAF loudspeakers are a combination of classical design speaker with a narrow dimension and advantages of an open baffle. JAF Bassoon represents an acoustic system in open, non-resonant technology with asymmetrical dipole nature of sound propagation, in which the radiation of rear side cone is obtained by a slit in enclosure. Loudspeaker have compact dimensions retaining the equivalent of large baffle width. The SFR technology (Smooth Frequency Response) allows to create the open baffle loudspeaker with a low frequency range and high efficiency, without adverse effects of classical large, flat baffle design.

Loudspeakers JAF Bassoon are available in four colours of varnish and three types of solid wood: Merbau, Acajou and Oak.

BASSOON

Technical data:

- Recommended power amplifier	from 20 W
- Frequency response (-1dB)	38Hz-20kHz
- Frequency response (-3dB)	32Hz-28kHz
- Nominal impedance	8 ohm
- Voltage efficiency	90 dB
- Damping factor (Qtc)	0,46
- Acoustic system	two-way, open
- Open baffle width equivalent	840 cm
- Dimensions (HxWxD)	1040x275x356 cm
- Weight	28 kg
