SFR OPEN BAFFLE

BOMBARD

J A F B o m b a r d is an evolution of the basic model of floor standing Bassoon loudspeaker. The principal differences lie in use of a higher class of transducers, the crossover filter components, internal wiring and terminals.

JAF loudspeakers are a combination of classical design speaker with a narrow dimension and advantages of an open baffle. JAF Bombard represents an acoustic system in open, non-resonant technology with asymmetrical dipole nature of sound propagation, in which the radiation of rear side cone is obtained by a slit in enclosure. Loudspeakers have compact dimensions retaining the equivalent of large baffle width. The SFR technology (Smooth Frequency Response) allows to create the open baffle loudspeaker with a low frequency range and high efficiency, without adverse effects of classical large, flat baffle design.

Loudspeakers JAF Bombard are available in four colours of varnish and three types of solid wood: Merbau, Acajou and Oak.

BOMBARD

Technical data:

- Recommended power amplifier	from 20 W
- Frequency response (-1dB)	36Hz-22kHz *
- Frequency response (-3dB)	31Hz-30kHz *
- Nominal impedance	8 ohm
- Voltage efficiency	92 dB *
- Damping factor (Qtc)	0,43*
- Acoustic system	two-way, open
- Open baffle width equivalent	840 cm
- Dimensions (HxWxD)	1096x295x356 cm
- Weight	34 kg

* depending on transducers used
